Art Unit: 1102

The proposed amendment of Oct. 6, 2003 will not be entered in that it raises new issues.

First, the proposed addition at the last line of claim 12, "wherein the device includes no more than one measuring gas compartment" clearly raises new issues.

Second, the proposed new method claim 24 raises new issues in that for the first time a claim now actually recites applying a pumping voltage such that a partial pressure of oxygen in the measuring gas compartment corresponds to a lamda value greater than or equal to 1.3.

Further, there is the issue whether new method claim 24 should be restricted from the present apparatus claims.
